

### **Editor-in-Chief**

#### ***Geochemistry: Exploration, Environment, Analysis***

The Association of Applied Geochemists (AAG) and the Geological Society of London (GSL) are seeking to fill the position of Editor-in-Chief of their co-owned journal, *Geochemistry: Exploration, Environment, Analysis (GEEA)*. There would be a period of overlap with the current Editor early in 2015, with the new Editor taking full management in the later months of the year. GEEA is available online through GSL's Lyell Collection, GeoScienceWorld or the AAG; it was established in 2001 and is published quarterly (<http://www.geolsoc.org.uk/geea>). The Journal covers all aspects of the application of geochemistry relating to exploration for mineral deposits. Topics include: new and improved methods of geochemical exploration; geochemical mapping; sampling and analytical

techniques; processes of dispersion of elements in rocks, soils, vegetation, water and the atmosphere; differentiation of geogenic and anthropogenic sources; statistical methods applied to interpretation; and related environmental aspects.

The position requires a strong background in research in this field together with a substantial publication record. The Editor will be a good communicator and have a high degree of organizational skills and leadership ability. Building a network with geochemists in academia, industry and government is vital. The Editor is free to build their editorial team and to develop the optimal arrangement of associate Editors and board members to carry out a balanced and efficient procedure for reviewing, editing and general processing of papers. The Editor will be in frequent email communication with the journal's Production Editor in Bath, UK and will interact with the Director of Publishing of GSL and also with other journal Editors within the GSL to aid in the establishment of an integrated policy and publishing system.

This is an exciting, evolving time in publishing globally and you can make your mark! The rewards are many, such as the opportunities to: create your vision of GEEA and take the journal in new directions; produce special thematic issues on emerging technologies/methods; develop an extensive network and new relationships within the broad community of geoscientists; and foster integration of related disciplines.

Please send expressions of interest to Gwendy Hall ([gwendyhall@gmail.com](mailto:gwendyhall@gmail.com)) for eventual review by a selection committee.
