

Pim van Geffen, PhD, PGeo
Principal Geoscientist
CSA Global, an ERM Group company

Short bio:

Dr Pim van Geffen is a professional geochemist based in Vancouver, British Columbia. He obtained his MSc at Utrecht University in the Netherlands and his PhD at Queen's University in Kingston, Canada. Since 2005 he has worked on a wide variety of projects around the globe, using applied geochemistry and data analysis for exploration and geometallurgical assessments. He currently works as a consultant with CSA Global, an ERM Group company. In this capacity he applies geochemistry and orebody knowledge to guide exploration and solve metallurgical and environmental problems throughout the mining value chain. He previously worked with Anglo American, ioGlobal, IMDEX, and as an independent consultant with Vancouver Geochemistry. Pim is a registered professional geoscientist with Engineers and Geoscientists of British Columbia, a fellow of the Association of Applied Geochemists, a fellow of the Society for Economic Geology, and serves on the technical advisory committee of Geoscience BC.
